

2-Way Diverter Valves

Long Life Heavy-Duty Diverter Valves

Line Diverter Series (HDV):

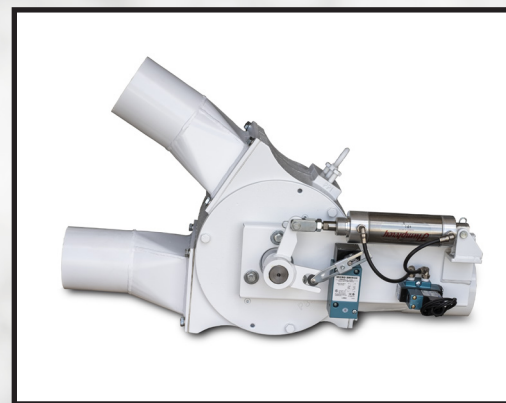

for products that are not highly abrasive or smear

Tunnel Diverter Series (HTV):

for applications where Line Diverters cannot be used or where two lines need to be converted into one

Benefits

- Durable cast iron construction
- Precision machined rotor for holding pressure
- Lifetime lubricated and sealed ball bearing with locking collar
- 15 PSIG Max leakage resistance
- Internal food-grade lubrication
- Excellent lead times

Made in USA

PROGRESSIVE
PRODUCTS INC.
The Elbow People™

Standard Features:

- Precision Machined cast iron housing and endplates
- Precision machined carbon steel rotor
- Lifetime lubricated and sealed ball bearing with eccentric locking collar
- Shaft sealed for maximum leakage resistance up to 15 PSIG pressure differential
- End plates, seals, and bearings are protected from material flow by rotor end plates and special food grade lubricant packed in the void area between the end plates and rotor hub
- Air operated rotary actuator with a 4-way single solenoid valve and switch assembly consisting of two SPDT limit switches to proof both positions of valve

Optional features include:

- Double solenoid air control valve
- Manual or electric actuators
- NEMA 7/9 electrical enclosures
- Ceramic coated tube adapters
- Factory pre-wiring of solenoid and limit switches to terminal box

What Customers Say:

"We have been doing business with Progressive Products for years and have always had quick turn on quotes and great customer service from all departments." - Ryan W.
